

bproauto® 5-and 10-year coolant

Keeps cool even in frigid temps

bproauto® coolant is designed to regulate engine temperature, preventing it from overheating or freezing under extreme conditions. Each formula protects engines from -37°C [-34°F] to -129°C [265°F], is prediluted for immediate use and embittered.

bproauto® 5-year coolant

- Service interval: 5 years/100k miles
- Low-silicate, phosphate-free
- Protects against cavitation, scale and corrosion
